

A photograph of a living room interior. A window is covered with a light-colored, textured Roman shade. To the right, a lamp with a white shade and a wooden base is lit. In the foreground, a sofa with white pillows is visible. A vase of white flowers sits on a table in front of the window. The scene is softly lit, suggesting a cozy atmosphere.

BERKELY FABRIC ROMAN SHADES

Berkely Fabric Roman Shades offer a classic design style with modern options. You'll find a unique fabric selection with sophisticated textures and jacquards, all offered in colors selected for current design trends.

The collection's ordering and customization options were designed with your experience in mind. Choose from flat, hobbled, knife pleated, or front slat shade styles. Flat, knife pleated, and front slat shades are available to order with or without a valance.

All shade styles come standard with light-filtering liner or can be upgraded to black-out. The collection's fabrics offer seamless fabrication in all shade styles up to 96" wide by 96" long.

Bring function and safety to your shades with a variety of lift options, including cordless operation that is able to lift even the heaviest shades on a 1½" head rail or our affordable, versatile wand and remote control motorization options, three unique ways to avoid hanging lift cords.

Enjoy peace of mind with our Limited Lifetime Warranty, covering all aspects of workmanship and quality in your shades.

SHADE STYLES

Flat Shade Style

Flat Shade Style
light-filtering lined with light
coming through

FLAT SHADE STYLE

Flat shades feature a flat, continuous fabric panel.

Most fabrics are available to be made in Flat style, with the exception of the fabrics noted by ^[1] on the Materials Reference table.

Liners of flat shades are seamed to provide added support. This will show a shadow on the front of light-filtering shades when light is coming through. We also recommend ordering all flat shades with hidden ribs. Hidden ribs are sewn into the liner material to allow a continuous front panel and provide extra support as the shade is raised and lowered.

Hobbled Shade Style

HOBBLED SHADE STYLE

Hobbled shades are made with extra fabric in each fold, allowing them to keep the folded look of a roman shade even when fully lowered.

Hobbled shades are made without ribs and have more lift cords on the back of the shade, which provide additional support when the shade is raised. See page 10 for details.

Hobbles will show between 9" and 12" on the front of the shade with 3" folds.

Hobbled shades are only available in waterfall style.

NOTE: Hobbled shades may require extra dressing in the window once installed.

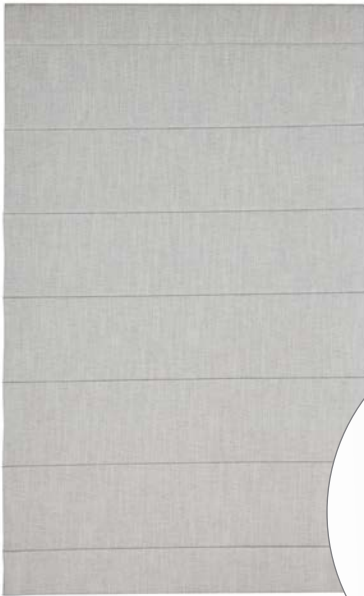

SHADE STYLES

KNIFE PLEATED SHADE STYLE

Ribs are sewn into pockets on the back of the shade.

There will be a seam on the front of the shade where each pocket is sewn.

Knife Pleat shades require the least amount of dressing once installed.

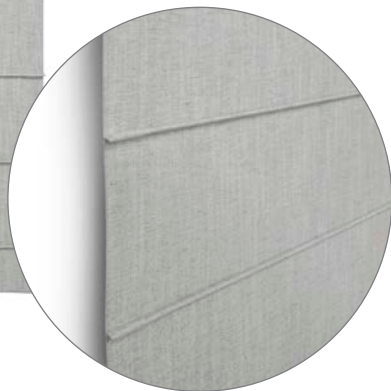

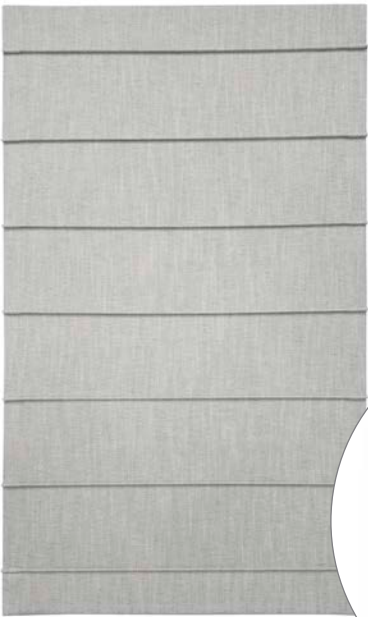

Knife Pleat Shade Style
ribs in back of shade

FRONT SLAT SHADE STYLE

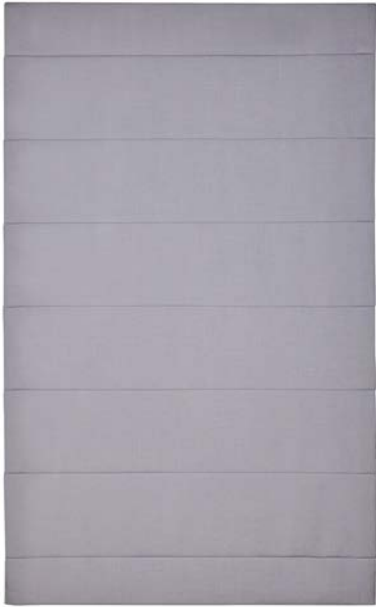

Ribs are sewn into pockets on the front of the shade.

There will be a pocket on the front of the shade where each rib is inserted.

Front Slat Shade Style
ribs in front of shade

SHADE STYLES

Waterfall Shade Without Valance

WATERFALL SHADE WITHOUT VALANCE

Waterfall shades come standard without a valance. Shade fabric comes off the front of the head rail.

Waterfall shades can be ordered with a front valance for a surcharge, which is used to cover the top fold of the shade.

Back valances hide the view of the components from the outside. They are available for no additional charge and are made of the liner fabric.

Interior valances are included for light-filtering waterfall shades and are used to block the outline of the shade components from showing on the front of the shade. Interior valances install between the shade panel and the components and are made using blackout liner material. They are 3¾" long.

Waterfall shades ordered with clutch have control cord loop hidden behind the shade.

Waterfall Front Valance

Standard Shade with Valance

STANDARD SHADE WITH VALANCE

Standard shades have a 6" valance on the front of the head rail. Custom valance lengths may also be ordered.

The shade fabric comes off the back of the head rail.

Standard shades ordered with clutch have control cord loop adjacent to the shade.

VALANCE ONLY

Valance Only is available for all fabrics.

Valances can be specified in length up to 18" long and have a maximum width of 96".

Valances will be attached to a head rail. Available head rail depths are 1½" and 2½".

Valances can be made with light-filtering liners (standard) or black-out liners (surcharge).

PANEL ALIGNMENT

TOP / BOTTOM PANEL ALIGNMENT

- Top and bottom panel alignment are available.

TOP PANEL ALIGNMENT

- We recommend ordering top panel aligned shades for most installations:
 - Shades that are the same height in side-by-side windows.
 - Shades that are differing heights in side-by-side windows where the tops of the windows align.
 - Shades that are not installed side-by-side.
- Top panel aligned shades will be made with the first row of rings sewn 6" from the top of the shade.
- Top panel aligned shades will have a shade apron that is between 4" and 7".

BOTTOM PANEL ALIGNMENT

- We recommend ordering bottom panel aligned shades for:
 - Shades that are differing heights in side-by-side windows where the bottoms of the windows align.
- Bottom panel aligned shades will be made with the last row of rings sewn at the seam of the 4" bottom hem.
- Bottom panel aligned shades will have a top fold that is between 4" and 9 7/8". When uneven top folds are a concern, we recommend ordering standard shades or waterfall shades with a front valance.

Top Panel Aligned

Bottom Panel Aligned

SHADE CONSTRUCTION

HEMS

Shades have a 4" double turned bottom hem and 1½" double turned side hems.

Front of Shade
4" bottom hem and 1½" side hem

Back of Shade
4" bottom hem and 1½" side hem

CORD AND RING COLOR

Lift cords, ladder tape, and shade rings are always white to match the liner on the back of the shade.

CORDING ON BACK OF SHADE

When selecting your shade style, consider the cording on the back of the shade.

Hobbled shades are made without ribs, giving them less stability. This shade style requires more cording on the back of the shade.

Knife Pleat, Flat, and Front Slat shades are made with ribs, giving them more stability. These shade styles require less cording on the back of the shade.

Hobbled Shades
require more cording

Knife Pleat, Flat, and Front Slat
Shades require less cording

DESIGN OPTIONS

LINERS

Shades come standard with a light-filtering liner. Black-out liners are available as a surcharge option.

Light-filtering liners are available in snow white or ivory. Black-out liner is available in white.

Liners are sewn underneath the side and bottom hems.

Note: Black-out liners will include black-out tape on the back of the shade to block pin holes of light from showing through. Black-out tape will be applied where the rings and ribs are sewn.

Shade with Light-Filtering Liner

Shade with Black-Out Liner

RETURNS

Outside mount shades are recommended to be ordered with valance returns. Returns for both outside and inside mount shades are available free of charge if requested at the time the order is placed.

Return height is 4½". Standard shades with a valance have returns made shorter than valance length to accommodate the stack of the shade.

All valance returns are made with an L-shaped connector that attaches to the side and front of the head rail to hold the return in place, creating a clean, finished corner.

4½" Return

MULTIPLE SHADES ON ONE HEAD RAIL

Shades are available as 2-on-1 head rail.

The maximum total width is 112" and the gap between shades will be no more than ½".

2-on-1 shades are only available for standard shade styles in flat, knife pleat, and front slat panel styles.

All control types can be used for these shades.

CONTROL OPTIONS

CORDLESS SHADES

Standard Control.

Cordless shades operate with no lift cords on the front of the shade. They are raised and lowered by pulling on the hem bar located behind the bottom panel of the shade.

Cordless shades will be supplied with a clear hem grip that attaches to the hem bar.

A spring control system located under the wooden head rail holds the shade in place at any desired position.

Hem Grip

Cordless Mechanism

CONTROL OPTIONS

CLUTCH CONTROL SHADES

Clutches provide an assisted lift on large shades.

Clutches come with a metal bead chain. Chains can be specified in custom lengths. If no length is specified, they will be supplied at $\frac{2}{3}$ of the shade height.

Compliant cord tensioners are provided with clutch control shades. Cord tensioners secure the cord loop to the wall or window. They must be installed for the shade to be compliant with safety regulations and to operate properly. When measuring for clutch shades find a suitable location for the cord tensioner to be installed and measure to this location.

Standard shades with valances that are ordered with a clutch come “clutch adjacent” to keep the stack of the raised shade from interfering with the loop. This means the shade fabric will be more narrow on the control side, allowing the cord to hang to the side of the shade. This may cause a light gap on black-out shades.

Waterfall shades without a valance ordered with clutch controls will have control loops behind the shade and are not available to be ordered as clutch adjacent.

Waterfall Clutch Shade
without valance

Standard Clutch Adjacent Shade
with valance

MOTORIZED CONTROLS

WAND CONTROL SHADES

Wand control shades are operated by a rechargeable lithium-ion battery motor.

Battery charging port is located in back of the wand handle.

5 available wand colors: white, beige, gray, bronze, and black.

4 available wand lengths: 24", 36", 48", and 60".

Motorized shades are mounted on a deeper head rail (see Specifications for details).

Shade fabric will be made more narrow than the ordered width on the control side, allowing the wand to hang on the side of the shade. This may cause a light gap on black-out shades.

Not available to be ordered with waterfall or hobbled shade styles.

CUT FABRIC

CUT FABRIC PRICING

All cut fabric is priced by the yard and cut to the full width of the fabric roll. See the Materials Reference table for cut fabric widths.

When ordering cut fabric, we can generally support orders up to 40 yards in length, but we cannot guarantee our ability to support larger orders. Please contact us before making any customer commitments on large cut fabric orders to confirm fabric availability and lead time.

	CUT FABRIC				LINER FABRIC ⁽¹⁾	
<i>Price Group</i>	A	B	C	D	LIGHT-FILTERING	BLACK-OUT
<i>Price Per Yard</i>	\$60	\$90	\$121	\$139	\$60	\$60

⁽¹⁾Light-filtering and black-out liners have a fabric width of 110".

CUT FABRIC NET FREIGHT SURCHARGES (ALL GROUPS)

When ordering cut fabric, please include the surcharges below.

WHEN SHIPPING WITH SHADE ORDER:
\$5 (per yard)

WHEN SHIPPING SEPARATELY FROM SHADE ORDER:
\$25 (for the first yard); **\$5** (each additional yard)

WARNING ON CORDED PRODUCTS

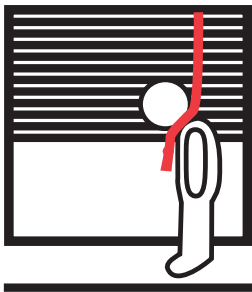

Ensuring child safety is paramount when it comes to window treatments.

When ordering products with continuous cord loops, there is the risk of strangulation when cord tension devices are not properly installed. **ALWAYS** install cord tension devices and keep them intact for the full life of the shade.

To mitigate the risk of child strangulation, choose cordless window coverings, which eliminate the danger of dangling cords.

⚠️ WARNING ⚠️ ADVERTENCIA

ANSI/CMAA 100.1-2022

Window Blind Cord Strangulation Risk

Window blinds with a damaged or loose tension device or retractable cord that fails to fully retract pose a strangulation risk to children. To avoid this potential strangulation risk, consider purchasing cordless products with inaccessible cords.

Riesgo de Estrangulamiento en Cuerdas de Persianas

Las persianas con un dispositivo tensor suelto o dañado o con una cuerda retráctable que no se ajusta completamente representan un riesgo de estrangulación para los niños. Para evitar un posible riesgo de estrangulamiento, considere comprar productos inalámbricos o productos con cuerdas inaccesibles.
