BERKELY BOX VALANCE

- Fabric-wrapped board valance which installs separately from shades.
- Valances can be installed using either a clip-on bracket or metal L/U-brackets.
- Clip-On brackets connect to a glider in a track on the valance, which allows flexibility in the bracket placement. Brackets, glider, and track are white. Clip-On brackets can be used for outside mount applications.
- Metal L/U-brackets are also available. Metal L-brackets can be used for inside mount applications. Metal U-brackets can be used for outside mount applications.
- Keystones are available and will wrap around the valance, connecting at the back of the valance with velcro.
- If ordering with a clip-on bracket, dust cover valances can be requested for no additional charge.
- Boards are ½" thick and are available in 4" or 6" heights.
- Can be ordered with or without valance returns. Returns are available in 3½", 4", 4½", or 5" standard sizes or can be requested in custom sizes between 1" and 6".
- Inside mount valances are recommended without returns; outside mount valances are recommended with returns.
- Inside mount box valances will be made with a ⅛" IB deduction.
- Box Valances are available up to 192" wide. Applications wider than 110" will have spliced box valances and will include a keystone.
- When adding valance returns, the Box Valance **must be ordered at least 1⅜" wider than the corresponding shade**. This width ensures that the valance will fit over the shade; it accommodates the extra width of the returns and hinges. See illustration on page 19.
- Order Box Valances under **Berkely Roller Shade Top Treatments** in your ordering system.

WARNING ON CORDED PRODUCTS

Ensuring child safety is paramount when it comes to window treatments.

When ordering products with continuous cord loops, there is the risk of strangulation when cord tension devices are not properly installed. **ALWAYS** install cord tension devices and keep them intact for the full life of the shade.

To mitigate the risk of child strangulation, choose cordless window coverings, which eliminate the danger of dangling cords.

BERKELY DISTRIBUTION BERKELY ROLLER SHADES

⚠️ WARNING ⚠️ ADVERTENCIA

ANSI/WCMA A100.1-2022

Window Blind Cord Strangulation Risk

Window blinds with a damaged or loose tension device or retractable cord that fails to fully retract pose a strangulation risk to children. To avoid this potential strangulation risk, consider purchasing cordless products with inaccessible cords.

Riesgo de Estrangulamiento en Cuerdas de Persianas

Las persianas con un dispositivo tensor suelto o dañado o con una cuerda retráctable que no se ajusta completamente representan un riesgo de estrangulación para los niños. Para evitar un posible riesgo de estrangulamiento, considere comprar productos inalámbricos o productos con cuerdas inaccesibles.
