## BERKELY WOVEN WOOD SHADES

### 2026 PRODUCT GUIDE

6951 Virginia Pkwy Suite 305 • McKinney, TX 75071 • Office: 945-327-0300

## ABOUT THE COLLECTION

Berkely Woven Wood Shades feature classic bamboos and soft jute fabrics in contemporary styles. Patterns are refreshed in white and gray color tones and in undyed fabrics that keep their beautifully natural hues.

Cord-free control options bring modern functionality to woven wood shades. Shades ordered with cordless controls will have 1½" head rails for all sizes up to 96" wide by 96" long. Shades can also be ordered with our wand and remote motorized control.

When selecting woven wood shades, always hold pattern samples up to the window to see how much light they let in and how the pattern changes with direct light coming through. Many woven wood patterns are very open and do not offer much privacy without a liner. If privacy is needed, choose between attached or operable liners.

Edge bindings are available for all patterns. Edge bindings offer a decorative accent of color and help protect the edges of delicate patterns.

# MATERIALS REFERENCE TABLES

| CODE    | PATTERN NAME        | PRICE GROUP | EDGE BINDING REQUIRED <sup>[1]</sup> | CORDLESS TDBU | COORDINATED EDGE BINDING COLOR | MAXIMUM SIZE MOTORIZED <sup>[2]</sup> (SQUARE FEET) |          |

# SHADE STYLES

## PATTERN SELECTION

The Materials Reference table provides useful technical information about each pattern and also identifies which price chart you should use. Coordinated edge binding are also listed for each pattern.

The fabrics in this collection are made from natural materials, which are subject to variation in color, texture, and weave. Like any natural product, fabrics may show natural color changes over time.

Woven wood fabrics are not ideal for rooms with excessive humidity like bathrooms. Shades installed in these environments may bow or twist over time.

## SHADE STYLES

Shades come in two basic shade styles: standard and waterfall.

### STANDARD SHADES

Has a 6" valance on the front of the shade.

Valances are lined with Room-Darkening liner material to conceal the head rail components. Unlined shades will have lined valances coordinated to the shade material. Light-filtering lined shades will have lined valances coordinated to the liner material.

### WATERFALL SHADES

Has no front valance. The shade comes off the front of the head rail in a flat panel.

Available with back valances, which can be ordered in either the shade fabric or the liner fabric for lined shades. Back valances conceal the shade components from the back of the shade.

Available with interior valances. Interior valances come standard with waterfall shades that are unlined or that are ordered with a light-filtering liner. Interior valances block the outline of the shade components from showing on the front of the shade. Valances are 4" long and are made with coordinated liner material. *Because the valance is made with Room-Darkening fabric, the part of the shade in front of the interior valance will look darker than the rest of the shade when light is coming through.*

## BOTTOM BARS

Clutch and motorized shades will be made with a flat sewn-in bottom bar. If hold down brackets are requested, a round bottom bar will be used.

Cordless shades are made with a rectangular bottom bar. The same bottom bar is used for both shades with or without hold down brackets.

Standard Shade  
with valance

Waterfall Shade  
without valance

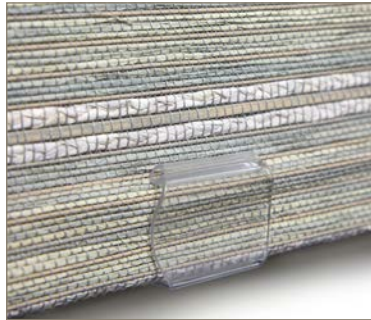

## CONTROL OPTIONS

### CORDLESS SHADES

Cordless shades are raised by pushing up on the hem bar and lowered by pulling down on the hem bar. A spring control system located under the wooden head rail holds the shade in place at the desired position.

Clear grips are added to the hem bar of cordless shades, one per shade up to 72" wide and two for wider shades.

Cordless shades are available up to 96" wide and 96" long and will be mounted on a 1½" deep head rail (see Specifications for details).

Clear Grip

Cordless Shade

### TOP-DOWN BOTTOM-UP

Raised from the bottom or lowered from the top.

To conceal shade components, shades will be finished with a Room-Darkening lined front valance and a back valance. Back valance will match shade material for unlined shades or liner material for lined shades.

TDBU shades are not available in waterfall style, as 3-on-1 head rail, or as twin shades. Only available with cordless control.

**Note:** Inside Mount TDBU shades are not available to be ordered with returns. For installations where returns are required for inside mount TDBU, follow the recommendation below:

Order shades as outside mount with returns. Shades should be ordered 1" narrower than the required width. This will leave a ½" gap on either side for the shade fabric, and the valance will be ¼" wider on either side to create a clean corner with the returns. This will cause light gaps on the sides of the shade, and the factory will not take any additional deductions.

Top Down Bottom Up Shade

# CONTROL OPTIONS

## CLUTCH CONTROLS

Clutches provide an assisted lift for large or heavy shades and come standard with metal chain loops. Metal chain loops can be made in custom lengths.

Compliant cord tensioners are provided with clutch control shades. Cord tensioners secure the cord loop to the wall or window. They must be installed so the shade is compliant with safety regulations and operates correctly.

Standard shades ordered with a clutch come “clutch adjacent” to keep the stack of the raised shade from interfering with the loop. This means the shade fabric will be narrower than the ordered width on the control side, allowing the cord to hang to the side of the shade (see diagram). This may cause a light gap on black-out shades.

Waterfall shades ordered with clutch controls will have control loops behind the shade and are not available to be ordered as clutch adjacent.

Clutch Shade with cord loop

Fabric Deduction

7/8" shade fabric deduction

1 1/8" shade fabric deduction for shades ordered with returns

# CONTROL OPTIONS

## PRO WAND SHADES

Pro Wand shades are powered by a rechargeable battery motor and are operated by pressing the buttons on the wand handle, which hangs to the side of the shade.

Pro Wand is a good alternative to cordless when the window or shade size makes it hard to raise or lower the shade.

USB-C charging port for the motor battery is located on bottom of the Pro Wand handle.

Wand is only available in White.

4 available wand lengths: 24", 36", 48", and 60".

Motorized shades are mounted on a deeper head rail (see Specifications for details).

Shade fabric will be made narrower than the ordered width on the control side, allowing the wand to hang on the side of the shade. This may cause a light gap on Room-Darkening shades.

Not available to be ordered with waterfall shade styles or for shades with a movable liner.

Pro Wand

5/8" shade fabric deduction for shades without returns

7/8" shade fabric deduction for shades with returns

# CONTROL OPTIONS

## REMOTE CONTROL SHADES

Remote motors have rechargeable and hardwired options available which can be controlled with remotes, wall switches, or motor hubs.

See Specifications for minimum widths by motor type.

<sup>[1]</sup>Requires installation by an electrician.

<sup>[2]</sup>Battery tubes are included with shades free of charge. Battery Tube has a 5¼" attached lead wire. Requires eight Alkaline batteries (non-rechargeable), Energizer® Ultimate Lithium™ L91 Batteries, or Lithium batteries (rechargeable). Batteries are not included with battery tube.

<sup>[3]</sup>Battery Pack has a 5¼" lead wire. Requires recharging. Ships separately from shades.

<sup>[4]</sup>Plug-in Power Adapter has a 60" lead wire. Powers motor directly through a standard wall outlet.

<sup>[5]</sup>When paired with the Plug-In Power Adapter, the total cable length should not exceed 16½'.

External LI Battery Pack

Plug-In Power Adapter

## PRO HUB

Connects through 2.4 GHz wifi or directly to router with ethernet cable.

Works with Connector+ App, Amazon Alexa, Control4, Google Home, IFTTT, RTI, Samsung Smart Things, and Siri Short Cuts.

## DESIGN OPTIONS

### EDGE BINDING

Edge bindings will be sewn down both sides of the shade and valance and are not applied to the bottom of either.

All edge bindings will be approximately ½" wide on the face of the shade.

Some patterns are required to be ordered with edge binding, as noted in the Materials Reference table. Patterns that require edge binding will have the warranty for frayed edges voided if ordered without it.

Edge Binding

# DESIGN OPTIONS

## VALANCE RETURNS

Valance returns attach to the sides of the head rail and cover shade components and head rail from the side view. Returns can be made with the shade material or with edge binding material.

All valance returns will be made with an L-shaped connector which attaches to the back of the valance and holds the return in place, creating a clean, finished corner.

Outside mount shades are recommended to be ordered with valance returns. Returns for both outside and inside mount shades are available free of charge if requested at the time the order is placed.

Standard height will be 1 1/2" less than the valance height, keeping the rolled bottom of the valance from interfering with the return. Short valance returns are also available. They cover the end of the head rail and hide the shade components, keeping the stack of the raised shade away from the returns.

Standard (*IB and OB shades*) and Extended (*OB shades only*) depth returns are available. Standard depth returns are made to the depth of the head rail. Extended depth returns are made 1/2" deeper than the head rail and help close the gap between the wall and the back of the return.

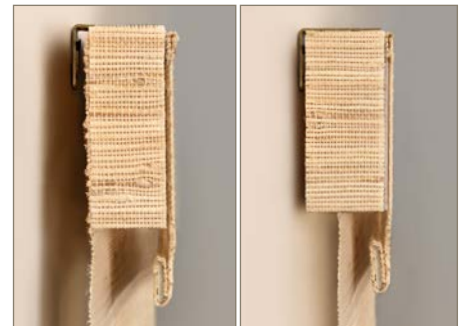

See chart below for return specification details or diagrams on page 15.

<sup>[1]</sup>Standard shades ordered with Clutch or Pro Wand control will have control side fabric deductions, which are in addition to the deductions listed for returns.

<sup>[2]</sup>Inside mount shades will have a 3/8" overall width deduction, which is in addition to the deductions listed for returns.

Standard vs Extended Depth Return shade fabric

Standard Shade with Return edge binding fabric

Waterfall Shade with Return

## DESIGN OPTIONS

### ATTACHED LINERS

Attached liners are secured on the back of the shade. Shades will have liner fabric tacked to the back of the shade fabric.

If a shade is lined, the valance will automatically be lined with the same liner style and color. Unlined shades will be made with a lined valance to conceal the lift mechanisms.

Many patterns let a lot of light through and offer little privacy at night. We recommend ordering shades with liners when light control or privacy is desired.

No Liner

Light-Filtering Liner

Black-Out Liner

### TWIN SHADES

Twin shades are shades with a separate, operable liner and two sets of controls: one for the shade in front and one for the liner shade behind. Controls are recommended to be on the same side of the shade.

Controls can also be a mix of cordless, clutch, and remote motorization. Cord loops for the liner shade will always be positioned behind the front shade.

Outside mount twin shades will be made with a valance that is  $\frac{1}{2}$ " wider than the ordered shade width. This will allow the returns to fit behind the valance.

Twin shades have deeper head rails to accommodate the dual sets of controls (see Specifications for details).

Twin Shades are not available as TDBU, 3-on-1 head rail, or with Pro Wand.

## DESIGN OPTIONS

### MULTIPLE SHADES ON ONE HEAD RAIL

Shades are available with 2-on-1 or 3-on-1 head rail. The maximum total width is 108". The gap between shades will be no more than ½". The maximum width for a common valance is 96"; wider valances will be made in sections to match the individual shade widths.

Clutches, cordless controls, and motorization (wand and remote) can be used for these shades. When ordered with clutch control, pay careful attention to make sure there are suitable locations for chain tensioners when specifying multiple shades on one head rail, particularly for the middle shade in 3-on-1 head rail units.

Available for standard shades and TDBU shades. Not available for shades with a movable liner.

### HOLD DOWN BRACKETS AND SPACER BLOCKS

Hold down brackets are supplied upon request for all control types.

Spacer blocks measuring ¾" are available upon request with a maximum of 2 spacer blocks per bracket recommended. **Note:** if using spacer blocks with extended returns, extended returns do not account for the additional space created by the spacer blocks.

Hold Down Bracket

### VALANCE ONLY

Valance Only is available for all fabrics.

Valances can be specified in length up to 18" long and have a maximum width of 96". Check the Materials Reference table for maximum fabric width by pattern.

Valance returns will be made to the ordered length of the valance or can be requested in custom lengths.

Standard (*IB and OB shades*) and Extended (*OB shades only*) depth returns are available. Standard depth returns are made to the depth of the head rail. Extended depth returns are made slightly deeper than the head rail and help close the gap between the wall and the back of the return.

Valances can be ordered attached to a head rail or loose. Available head rail depths for attached valances are: 1", 1 ½", 2 ½", 3 ½", or 5".

Valances can be made with liners and edge binding for a surcharge. Please specify if valances should be lined or unlined and made with or without edge binding when placing your order.

# SPECIFICATIONS

## INSIDE MOUNT SHADES

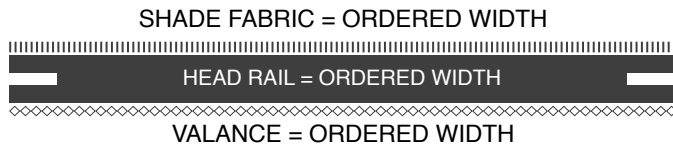

Inside mount shades have a  $\frac{3}{8}$ " overall shade deduction.

When ordered with returns, the valance and shade fabric will be made to the ordered width less the inside mount deduction. The head rail will be an additional  $\frac{1}{2}$ " narrower to create space for the returns to slot in and create a clean corner in the front of the shade.

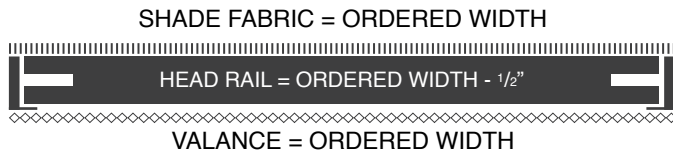

Inside mount shades are made with standard depth returns, which match the depth of the head rail.

### INSIDE MOUNT STANDARD SHADES

NO RETURNS:

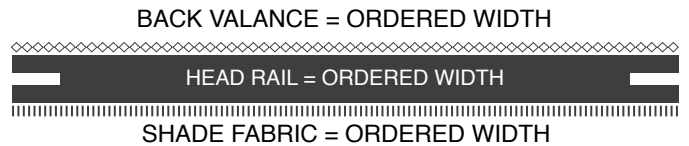

WITH RETURNS:

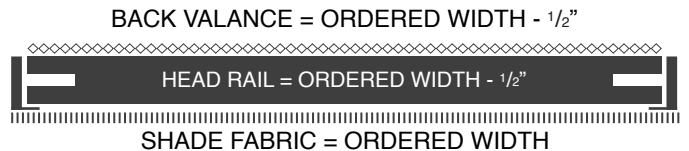

### INSIDE MOUNT WATERFALL SHADES

NO RETURNS:

WITH RETURNS:

## OUTSIDE MOUNT SHADES

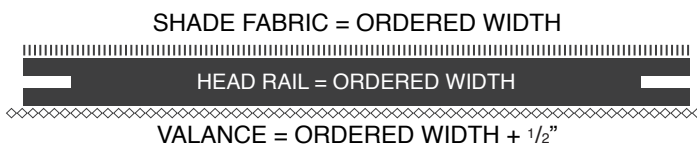

Outside mount shades have no deductions to the shade fabric.

Standard shades have a valance that is  $\frac{1}{2}$ " wider than the ordered width. Waterfall shades have the head rail  $\frac{1}{2}$ " narrower if ordered with returns.

Outside mount shades are available with standard depth returns or extended depth returns. Standard depth returns match the depth of the head rail. Extended depth returns are made  $\frac{1}{2}$ " deeper than the head rail and help close the gap between the wall and the back of the shade.

VALANCE ONLY EDGE BINDING SURCHARGE: **\$35**

## WARNING ON CORDED PRODUCTS

Ensuring child safety is paramount when it comes to window treatments.

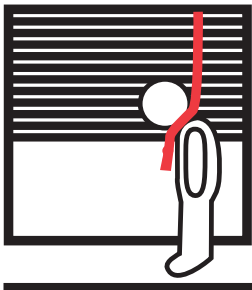

When ordering products with continuous cord loops, there is the risk of strangulation when cord tension devices are not properly installed. **Always** install cord tension devices and keep them intact for the full life of the shade.

To mitigate the risk of child strangulation, choose cordless window coverings, which eliminate the danger of dangling cords.

# BERKELY DISTRIBUTION BERKELY WOVEN WOOD SHADES

## ⚠️ WARNING ⚠️ ADVERTENCIA

ANSI/WCMA A100.1-2022

### Window Blind Cord Strangulation Risk

Window blinds with a damaged or loose tension device or retractable cord that fails to fully retract pose a strangulation risk to children. To avoid this potential strangulation risk, consider purchasing cordless products with inaccessible cords.

### Riesgo de Estrangulamiento en Cuerdas de Persianas

Las persianas con un dispositivo tensor suelto o dañado o con una cuerda retráctable que no se ajusta completamente representan un riesgo de estrangulación para los niños. Para evitar un posible riesgo de estrangulamiento, considere comprar productos inalámbricos o productos con cuerdas inaccesibles.
