ZEBRA SHADE FEATURES

- A shade of unique beauty and performance for the finishing touch to your window and room.
- Horizontal fabric vanes float between two layers of soft, knitted sheers to enlighten your view.
- New vane fabrics feature a softer look for your windows.
- Add a fabric-wrapped headrail and a matching fabric-wrapped bottom rail to offer a sophisticated look.
- Vanes glide from open to closed to out-of-sight with graceful, efficient hardware.
- The Zebra control system provides distinct variations of vane positions for any combination of privacy, view and light control.
- An adjustable weight system hidden in the bottom rail allows for on-the-spot adjustment to lend a balanced appearance in the window.
- Color coordinated, a fabric-wrapped headrail and a matching fabric-wrapped bottom rail to offer a sophisticated look.
- All Inside Mounted (IB) Shades will have a light gap on the left and right side. The side with the controls will have a slightly larger light gap.
- Easy to install hardware and brackets allow for effortless setup and easy removal for cleaning.
- Zebra Shades can be ultrasonically or traditionally cleaned to stay bright and beautiful.

CHILD SAFETY INFORMATION

THE MANUFACTURER IS COMMITTED TO CHILD SAFETY REGARDING WINDOW COVERINGS

The Manufacturer has committed to join the Window Covering Manufacturers Association's new safety standards in the efforts to prevent accidents involving children and pets with accessible cords and by offering other product options that are child-safe custom window coverings.

"BEST FOR KIDS" CERTIFIED PROGRAM

Window Covering Manufacturers Association (WCMA) announced the industry's first third-party certification program designed to help consumers and retailers identify window covering products that are best suited for use in homes with young children.

To be part of the new Best for Kids program, products are submitted to a WCMA-recognized third party testing laboratory where the products are required to meet stringent criteria. Once the products meet these criteria, they are Certified Best For Kids. The Manufacturer has a number of products with this distinction.

CHILD SAFETY IS SERIOUS BUSINESS

That's why the Manufacturer is removing all cords from products, in compliance with the Consumer Product Safety Commission's new guidelines for child-safe window treatments. A variety of control options, including the Safety Wand, traditional cordless control, and motorization, are available, providing the same convenience while making safety a top priority.

For more information on the CPSC's new guidelines and the Manufacturer's compliance with them, please visit: [federalregister.gov/documents/2022/11/28/2022-25041/safety-standard-for-operating-cords-on-custom-window-coverings](https://www.federalregister.gov/documents/2022/11/28/2022-25041/safety-standard-for-operating-cords-on-custom-window-coverings).

REESE'S LAW

These products are designed and manufactured in compliance with Reese's Law (P.L. 117-171), including the safety standard for button cell and coin batteries (16 CFR Part 1263), which incorporates by reference UL 4200A-2023.

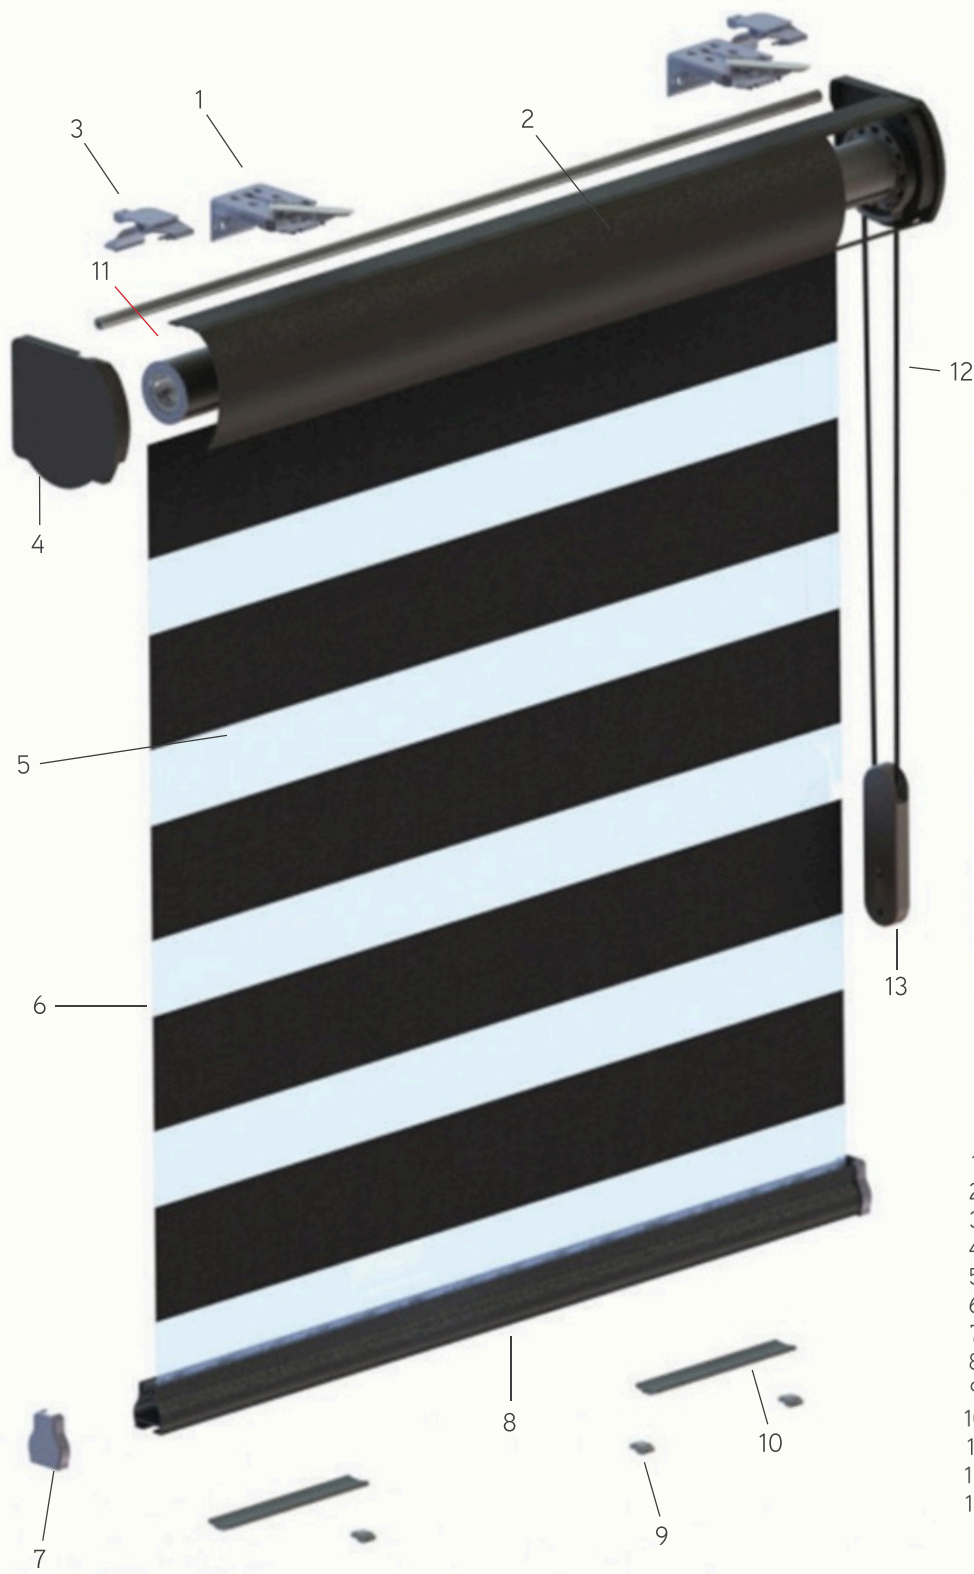

⚠️ WARNING

- **INGESTION HAZARD:** This product contains a button cell or coin battery
- **DEATH** or serious injury can occur if ingested.
- A swallowed button cell or coin battery can cause **Internal Chemical Burns** in as little as **2 hours**.
- **KEEP** new and used batteries **OUT OF REACH** of **CHILDREN**
- **Seek immediate medical attention** if a battery is suspected to be swallowed or inserted inside any part of the body.

CORDLESS ZEBRA SHADE

MOTORIZED ZEBRA SHADE

MOTORIZED WAND OPTION

TECHNOLOGY THAT ENHANCES THE LIVING SPACE

Rechargeable Motor Wand Control.
(Remote Ready)

- Easy Installation with No Hard Wiring.
- Long Last Lithium Ion Battery.
- Simple UP/DOWN/STOP Control Buttons for Lift and Tilt Options.
- Micro USB for Charging the Battery.

WANDS		MSRP COST	
Replacement Wand		\$175	
ADDITIONAL CHARGING BRICK & USB CABLE			
6ft Cable	\$50	10ft Cable	\$60

Every motorized shade comes standard with a wand.

These products are designed and manufactured in compliance with Reese’s Law (P.L. 117-171), including the safety standard for button cell and coin batteries (16 CFR Part 1263), which incorporates by reference UL 4200A-2023.

REMOTE CONTROL OPTION

REMOTE CONTROL - OPTIONAL

- Radio remote.
- Control your shade with a single-channel or multi-channel remote from up to 100 feet away, with up to 20 shades per channel.
- Simple UP/DOWN/STOP Control Buttons for lift and tilt functions.
- Remote attaches to backplate via magnets to mount in convenient location.
- No pull cords for superior child and pet safety.
- Sleek, modern design fits any decor.

Single Channel

MSRP \$88

Multi-Channel

MSRP \$116

FCC Certification: The FCC doesn't manufacture products but regulates the radio frequency (RF) devices sold in the US to ensure they do not interfere with other services. Any remote control using RF technology must have FCC approval, which involves the manufacturer submitting documentation and a Declaration of Conformity.

These products are designed and manufactured in compliance with Reese's Law (P.L. 117-171), including the safety standard for button cell and coin batteries (16 CFR Part 1263), which incorporates by reference UL 4200A-2023.

⚠️ WARNING

- **INGESTION HAZARD:** This product contains a button cell or coin battery
- **DEATH** or serious injury can occur if ingested.
- A swallowed button cell or coin battery can cause **Internal Chemical Burns** in as little as **2 hours**.
- **KEEP** new and used batteries **OUT OF REACH** of **CHILDREN**
- **Seek immediate medical attention** if a battery is suspected to be swallowed or inserted inside any part of the body.

MEASURING

INSIDE MOUNT WIDTH (IB)

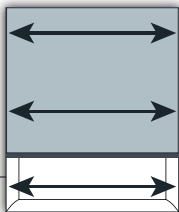

- Measure the exact width of the inside edge of the window frame. - Top, Middle, and Bottom.
- Make all measurements to the nearest 1/8th inch, round DOWN for width.
- Take the SMALLEST of the 3 measurements, this is the width that you will order.
- Production department will make the necessary deductions to ensure the shade fits inside your window.

INSIDE MOUNT HEIGHT (IB)

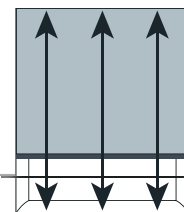

- Measure the exact height from the top inside edge down to the window sill in 3 places. - Left, Middle, Right
- Make all measurements to the nearest 1/8th inch, round UP for height.
- Take the LARGEST of the 3 measurements, this is the height that you will order.

NOTE: IB - THE FACTORY WILL DEDUCT 1/8-3/16" OFF THE TOTAL WIDTH.
OB - THE FACTORY WILL MAKE THE PRODUCT TO THE EXACT MEASUREMENTS PROVIDED.

OUTSIDE MOUNT WIDTH (OB)

- Measure the exact width of the window frame or how wide you would like the shade to be.
- Be sure to measure wide enough to cover the entire window (and trim if desired) to provide maximum light coverage.
- Example: If the window opening is 36" wide, it might be helpful to order 40" if the space allows. This will provide 2" coverage on each side of the window.
- No deductions/additions will be made to the width ordered.

OUTSIDE MOUNT HEIGHT (OB)

- Measure the height you would like the shade to be by measuring top to bottom.
- Be sure to measure high enough to cover the entire window (and trim if desired) to provide maximum light coverage.
- Example: If the window opening is 60" high, it might be helpful to order 64" if the space allows. This will provide 2" coverage on top and bottom of the window.
- No deductions/additions will be made to the height ordered.

Shades can be +/- an additional 1/8" within factory standard post production.

MISCELLANEOUS INFORMATION

CLEANING AND CARE INFORMATION

Sheerview Shades are uniquely low-maintenance, needing only periodic vacuuming on a low setting and occasional feather dusting. The sheer fabric may also be ultrasonically cleaned.

FINISHED DIMENSIONS

Once ordered and manufactured, the width of the fabric cannot be altered. The Manufacturer makes deductions to the width of window shadings depending on the type of mounting indicated. For all mounting types, the fabric will measure exactly the length ordered when the vanes are in the open or "view-through" position. When the vanes are rotated to the closed position, the shading will become 3/8" longer.

MEASUREMENT CONSIDERATIONS

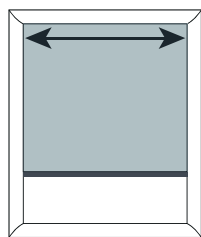

When closed on an inside mount, a slight furrow may occur on the lowermost sheer section because of contact with the sill. To compensate, slightly raise the shading until the rail begins to lift off the window sill.

If preferred, the shading can be ordered 3/8" less than the measured height of the window opening. In this case, the bottom rail will be positioned 3/8" above the sill when the vanes are in the open position. Rotating the vanes closed will cause the bottom rail to touch the window sill and thus closing any unwanted space.

HEADRAIL INFORMATION

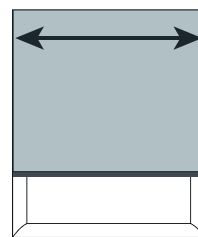

INSIDE MOUNT

Minimum depth for flush inside mount including installation brackets: 3 1/4"

OUTSIDE MOUNT

Minimum surface area required for mounting: 3/4"

CORD INFORMATION

CORDS WILL NO LONGER BE AVAILABLE ON ANY PRODUCTS SOLD BY THE MANUFACTURER, IN COMPLIANCE WITH NEW CPSC GUIDELINES UNLESS FOR SAFETY TENSION DEVICE.

The Consumer Product Safety Commission has announced new guidelines, to go into effect May 20, 2023, restricting the manufacture of corded custom window treatments in the interest of child safety. In accordance with the new CPSC guidelines, the Manufacturer will no longer be producing any window treatments with cords.

PRODUCT OPERATION

SHADING OPERATION

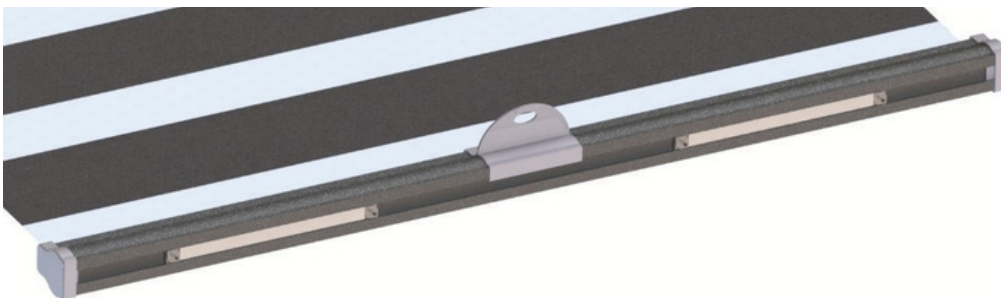

Zebra shades feature alternating horizontal bands of sheer and opaque fabric, allowing for precise control of light and privacy. By operating the headrail, the fabric layers slide over one another, so the opaque bands can fully block light or align with the sheer bands to let natural light in while maintaining some privacy. The shades can be smoothly adjusted to any position, providing a seamless transition between filtered daylight and full coverage, making them both functional and stylish for modern interiors.

HARDWARE

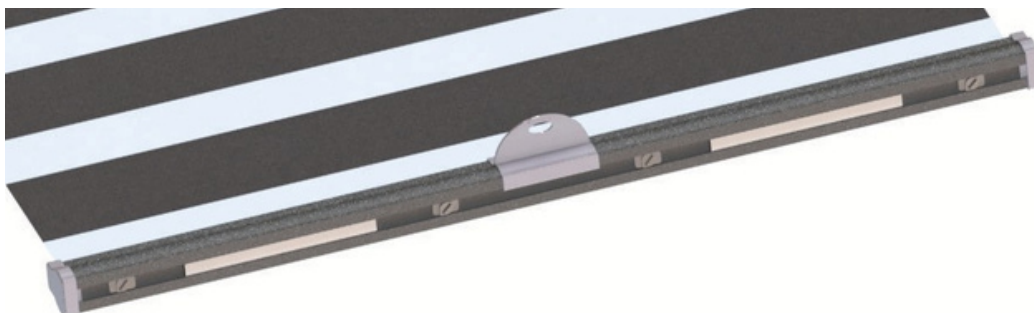

- Installation Headrail Brackets
- Multi-faceted bracket system includes breakaway shims to assist in leveling. The bracket also includes easy release lever.
- Spacer Blocks – Upon Request Only
- Spacer blocks project the shading 3/8" from the mounting surface. Use spacer blocks to obtain clearance when obstructions, such as window cranks or door handles, obstruct the movement of shading.
- Hold Down Brackets – Upon Request Only
- Hold down brackets are made of clear plastic that fit into holes on the end-cap of the bottom rail. Hold downs are generally used to secure the base of the window shading to prevent swaying.

SKEW ADJUSTING BOTTOM RAIL

The Zebra Horizontal Shades are leveled and weighed in the factory. When installed level, the fabric will not skew when raised. If the headrail is not installed level, skewing can occur that can damage the edge of the fabric. Be sure to follow the instructions below carefully to ensure correct and balanced operation.

Turn over the bottom rail use a flat head screwdriver to twist both stoppers on the left and right side of the counterweight slide.

Slide the bar to where the counterweight is needed to combat the shifting of the shades. Twist down with a flathead screwdriver on both stoppers in order to re-lock the counterweights.
